## Success Stories

**Client:** The Client: Black Owned Business LLC

**Project:** Provided IT and Design consulting with full development of security integrations, by creating an IT Search Infrastructure.

**Project Cost:** \$35,000.00

**The Problem:** The company needed to create a search engine for customers to access business throughout the U.S.

**The Solution:** Create a search engine that combines social media with a vendor marketplace and directory, that would be scalable.

**Result:** We created a very marketable and scalable search engine (Findbobs), which allowed our clients, customers to seamlessly search for services from a number of vendors that are listed in our clients directory and on their website. services from a number of vendors that are listed on our client's website.
